

Kildare's First Annual "Easter for Autism" Brunch

PHILADELPHIA, PA (March, 2005)

This Easter Sunday, Kildare's in West Chester and Manayunk will be hosting their First Annual Easter for Autism Brunch. \$1 from each brunch sold will be donated to the local Autism Society of America. Dave Magrogan, the owner of Kildare's, knows how important Sundays are to families. Growing up, his Sundays were spent going to church and then on to his grandmother's house for some traditional Irish comfort food. Not everyone is lucky enough to have an Irish Grandmother so Dave brings those fond memories of Easter Sunday Brunch alive so everyone can enjoy.

Autism is a complex developmental disability that typically appears during the first three years of life. The result of a neurological disorder that affects the functioning of the brain, autism impacts the normal development of the brain in the areas of social interaction and communication skills. Children and adults with autism typically have difficulties in verbal and non-verbal communication, social interactions, and leisure or play activities. Autism is a spectrum disorder that affects each individual differently and to varying degrees of severity. As many as 1.5 million Americans - children and adults - are thought to have autism today.

Kildare's First Annual Easter for Autism Brunch will feature such classics as Prime Rib, Ham & Cabbage, Omelet station, smoked salmon, Banger (Irish Sausage), Rashers (Irish Bacon), and more. Brunch starts at 10am and is served until 3pm. Bring the family, have a great meal and even listen to live Irish music from Noon to 4pm. Reservations are highly recommended. www.kildarespub.com
